AIM

To design and develop a Patient Appointment & Scheduling Management dashboard using the Zoho Creator low-code platform, which collects patient appointment details through a form and displays them as live summary metrics, reports, search and department-wise rankings.

PROCEDURE

1. Sign in to **Zoho Creator** and click **Create Application** → Start from scratch. Name the application **Patient Appointment & Scheduling Management**.
2. Create a form named **Appointment_Booking_Form**. Drag and drop the fields: Patient Name, Age, Gender, Email, Department (Orthopedics, Dental, Cardiology) and Appointment Status. Save the form.
3. Submit sample records through the form (five patients were entered) so the data can be used in the dashboard.
4. Create a new **Page** named **patient appointment dashboard** and open the page builder (drag-and-drop layout with a grid of panels).
5. Add a **Number/KPI widget** showing **Total Appointments** using the record count of the form.
6. Add the form's **List Report** as an embedded report to display patient name, age, gender and email, with the search and add (+) options.
7. Add a **Button** labelled Book a Appointment that opens the Appointment_Booking_Form for new bookings.
8. Add a second KPI widget for **Confirmed Appointments** and a **Search box** (patient email id) to look up a patient's record.
9. Add a button linked to the patient appointment form and a **Donut/Progress chart** showing the confirmed appointment percentage (21%).
10. Add a **Leaderboard** widget (Project Leaderboard) that ranks departments — Orthopedics, Dental and Cardiology — by number of appointments.
11. Apply background colours and layout to each panel, click **Save**, then **Access Application** to preview the dashboard in Live mode.

OUTPUT SCREENSHOTS

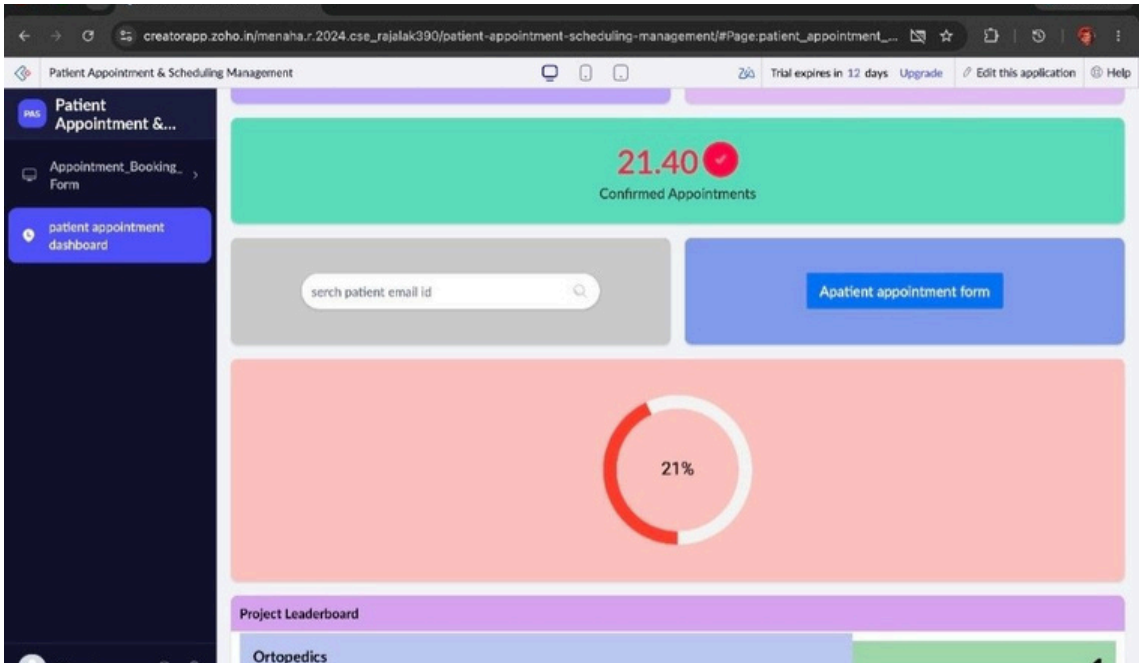

Fig 2: Dashboard – Confirmed Appointments, email search, appointment form button and percentage chart

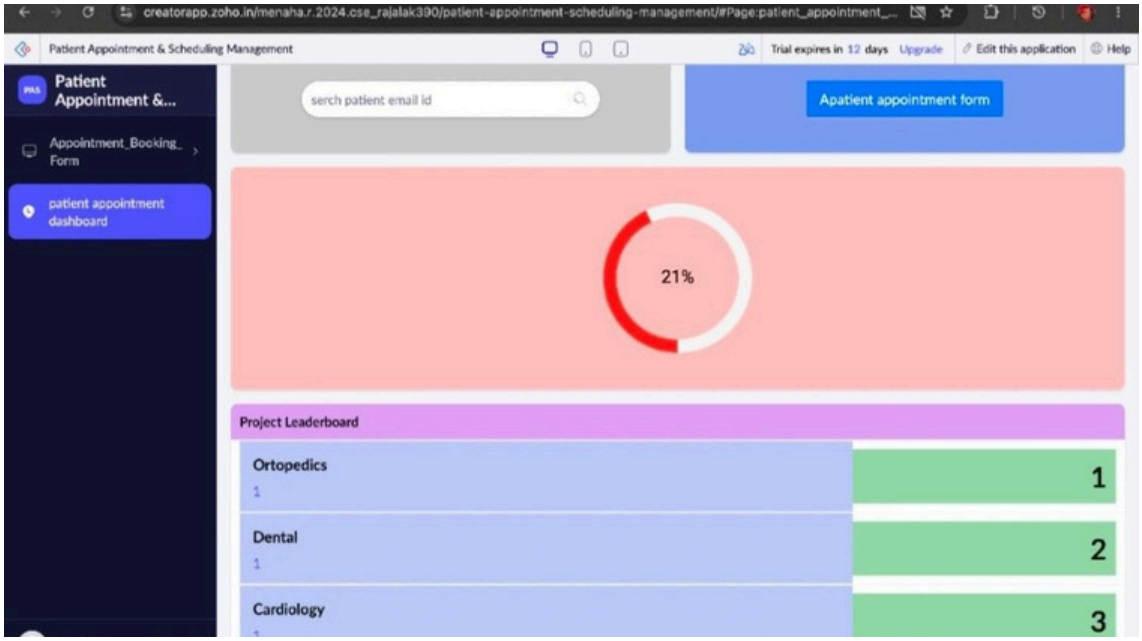

Fig 3: Dashboard – Project Leaderboard ranking departments

RESULT

ThePatient Appointment & Scheduling Management application was successfully built in Zoho Creator with minimal coding. The dashboard displays:

- **Total Appointments:** 5 records captured through the Appointment_Booking_Form.
- **Appointment report:** patient name, age, gender and email of the booked patients (Showing 5 of 5).
- **Confirmed Appointments** metric and a **21%** progress chart.
- **Quick actions:** a Book a Appointment button, a patient appointment form button and an email-id search box.
- **Leaderboard:** department-wise ranking (Orthopedics – 1, Dental – 2, Cardiology – 3).

Thus, the patient appointment dashboard was designed and executed successfully using the Zoho Creator low-code platform.
